---

Enclosed you will find the Summer Food Service Week proclamation from the Secretary of Agriculture, Mike Johanns, for the week of June 4-10, 2006. Please post the proclamation where the public may have an opportunity to read about the importance of the summer program, either at your summer sites, district office, or other prominent location. The week long observation is designed to help raise awareness of program benefits, promote greater participation in communities, and most importantly, increase the number of children receiving nutritious meals during the summer.
